

## TFT Display Differences

**RM420-015**  
replaced by RM420-015B from 13 Oct 2008

Ethernet

including  
Table-Top Stand  
52-3015A

AC Input

including  
Power Supply  
PAEH15US48

difference:  
48V chassis  
socket for  
power supply

**RM420-015B**

including  
Table-Top Stand  
52-3015A

AC Input

including  
Power Supply with  
integrated  
Power over Ethernet  
Inserter  
PPSA16U480POE

Ethernet

Power  
over  
Ethernet

**52-4015A**

Power over Ethernet

The RM420-015B replaces the RM420-015 at the same price. All orders will be changed automatically. The only difference is the power supply.

The RM420-015B is supplied by Power over Ethernet using a power supply with integrated Power over Ethernet inserter (PPSA16U480POE). What is different in the display hardware is the now eliminated 48V socket for the 48V power supply.

If you order a 52-4015A, a 52-3015A and a PPSA16U480POE together, you will receive the same hardware set as in item RM420-015B.
